

ACRIN 6664

SUMMARY OF CHANGES

August 4, 2010

Administrative Update

This Administrative Update corrects an oversight in the drafting of protocol Amendment 2; it has come to our attention that the revisions included and approved by CTEP in Amendment 1 (v. March 17, 2005, approval notice dated March 24, 2005) were not included in the Amendment 2 revisions. This Administrative Update corrects this issue. The Administrative Update also reflects the current URL for protocol-specific content on the ACRIN.ORG Web site.

Cover Page

The Original Protocol Date (September 28, 2004), Amendments 1–2, and Administrative Update (August 4, 2010) have been added.

6.1 Institution Requirements, Page 20

The ACRIN web site for the protocol specific application has been updated and now reads: http://www.acrin.org/6664_protocol.aspx.

9.0 Data Collection Forms, Page 28

For the CS - PQ Form Cover Sheet form, the phrase, “to ACRIN headquarters for data entry”, has been added to the last sentence.

12.1.2 Stool/Fluid Tagging, Page 36

The section has been extensively revised and now reads:

12.1.2 Stool/Fluid Tagging

Twenty four hours before beginning preparation patients will begin to ingest barium sulfate, given in up to three doses. Following cathartic cleansing, patients will ingest at least 5 ml of water soluble oral contrast material.

15.2.2 For Aim 3.1.2 (Interobserver Variability), Page 46

In the 1st sentence of the second paragraph, “compete” was changed to “complete”.

Appendix IV ACRIN Protocol-Specific Application Information, Page 79

The ACRIN web site for the protocol specific application has been updated and now reads: http://www.acrin.org/6664_protocol.aspx.
